Förster

Förster is a range of premium building materials from EcoBoard. German for Forest Ranger, Förster is committed to protecting forests through environmentally compatible processes. Developed with German engineering, Förster products are made using top-of-the-line German machinery.

Förster offers highly functional and sustainable building materials, which are substitutes to traditional wood-based panels. The brand's extensive portfolio assures products specific to the needs of its varied clientele.

EcoBoard

EcoBoard is one of the World's leading companies developing Sustainable Living Spaces. Its technology and processes are heavily centred around the environment, with a mission to help protect and restore nature, while crafting superior quality products.

EcoBoard processes natural fibres to create wood-free panels. EcoBoard is the first company to receive an Ecomark approval from the BIS, an indication of the minimal impact caused to the environment.

EcoCraft

For generations, wood has been used as a medium of art in cultures all over the world. Handicrafts, sculptures, carvings and functional objects are carefully crafted from high quality wood. While directly replacing wood in ancient and contemporary art, EcoCraft is designed to offer a sustainable solution without compromising on creativity. EcoCraft panels are of the highest quality and router-friendly to ensure individual expression.

Advantages

EcoCraft panels are **E1 grade**, **fire retardant** and **termite proof**, enhancing working conditions. They are Ecomark certified and have been used in platinum-rated Green buildings. EcoCraft panels are **router-friendly**, allowing for the utmost creative freedom.

Applications

Förster's EcoCraft panels lend themselves to a variety of uses.

- Resorts & Hotels
- Premium Homes & Apartments
- Spiritual Spaces
- Shopping Malls & Stores
- Auditoriums
- Theatres
- Heritage Site
- Culture Centres

EcoCraft panels comply with European norms, making for safer spaces

EcoCraft panels are made of natural fibres and certified with an Ecomark from the BIS

IS 3087/ 12823: Our panels comply with BIS approved technical specifications

EcoCraft products are fire-retardant to ensure a secure experience

EcoCraft products are router-friendly and can be customised with 3D art work

All EcoCraft panels are specially treated to ensure that they are 100% microorganism free

Finishes

Laminate/ Plain/ Texture/ UV Finish*

Sizes (in mm): 4090 X 1828 / 2045 X 1828 (other sizes on request & subject to availability)

Grade: ND, SD

EcoCraft vs Rubber Ply

Technical Specifications	Units	EcoCraft	Rubber Ply
Density	kg/m ³	740	600
MC	%	5.70%	6.00%
Time to Ignition		No	Medium
Combustible		No	Yes
Laminate		Yes	No
Durability		High	Low

Disclaimer: The results are based on tests done in controlled conditions and for specific applications. Actual results will vary based on environments, usage and different grade of materials. The above values are only for reference purpose only and all images used are for representation purposes only.

Reed Plant

Förster's EcoCraft panels share an association with the Reed Plant. Reeds are usually found along water bodies, and grow in a multitude of different weather conditions, from the Arctic to the Tropics. For millennia, reeds have played an important role in building functional items as well as crafts. They were used as thatching and construction material for homes, as well as to make baskets, arrows, pens and instruments.

Your Förster product is of the highest quality, having undergone thorough checks at each stage. For every five panels purchased, you are helping to save one tree from being cut down.
